Saroj Baral

Project Control, MIS & Business Operations

Kathmandu, Nepal | sarojbaraal@gmail.com | +977-97010-83549 | linkedin.com/in/sarojbaraal

Summary

Engineer with six years of project implementation, technical sales and solution delivery at Huawei Technologies Nepal, followed by independent MIS and operations consulting for small and medium businesses. I turn scattered inputs from sales, finance, supply chain and vendors into one accurate, reportable picture, and I hold an Executive MBA in strategic management.

- Project planning and end-to-end implementation
- Workflow optimisation and process improvement
- Technical sales and solution-led client engagement
- MIS development, optimisation and data-driven reporting
- Cross-functional coordination across sales, finance, supply chain and delivery

Experience

Freelance Consultant, IT Solutions & Business Operations

2022 to Present

Self-employed, Kathmandu, Nepal

- Advise SMEs on IT solutions and MIS, covering requirement analysis, workflow optimisation and data reporting.
- Write technical documentation and project plans that a client team can run after handover.
- Support business development with technical proposals and solution design.

Engineer / Manager

2013 to 2019

Huawei Technologies Nepal Co., Pvt. Ltd., Kathmandu, Nepal

Technical solution and strategy

- Translated client business and technical requirements into scalable IT solutions, from design and integration through implementation.
- Advised customers on information-systems strategy covering policy, security and service-delivery frameworks.
- Ran technical feasibility studies, risk assessments and system-security evaluations.
- Led solution design and forecasting against business trends and customer requirements.
- Worked with sales, finance, supply chain and delivery teams to prepare technical bids and finalise solutions.

Project control and operations

- Planned, executed and monitored projects to hold delivery dates and quality standards.
- Set priorities, delegated work and enforced operating procedures and deadlines.
- Oversaw budgeting, contracting and administration for project management.
- Kept ERP data accurate and issued regular performance reports to senior management.
- Led material planning and inventory coordination from BOQ and SCM systems.
- Introduced change-control processes to keep execution on course.

Leadership and coordination

- Guided vendors and internal teams to build capability and meet delivery timelines.
- Aligned project outcomes with customer expectations through regular stakeholder coordination.
- Supervised support staff and kept records and documentation orderly.

> Certificate of Merit, Top Performing Team, WDM Golden Seeds Training Programme, Shenzhen (2019)

Survey Engineer

Nov 2011 to May 2012

GTL Nepal, Kathmandu, Nepal

- Assessed power supply and network status at multiple BTS sites.
- Wrote detailed technical reports and optimisation recommendations from each assessment.

Intern Sep 2010 to Dec 2010

Radio Nepal, Kathmandu, Nepal

- Troubleshot, repaired and maintained broadcasting equipment.
- Worked with the technical team to analyse signal quality and improve transmission performance.
- Assisted in introducing new technology for broadcasting.
